

I agree to the terms above

Note: Again, farming is not an exact science, and it is mostly up to the weather how and when food develops. Timing and quality will be off predictions, but we will make every effort to provide our customers their money's worth, and meet or exceed their expectations at one time or another during the terms of production.

We will reduce your cost of shares by \$4.00 per hour by volunteering to weed the vegetable fields on our farm.
